

PEDESTRIAN ENTRANCE CONTROL

Card Capture

CC100 Range

The CC100 is a standalone visitor card capture device for various type of cards.

It can work with simple paper passes or can be integrated with the end users own access control reader.

The slim profile makes it easier to install beside or in front of most makes of pedestrian entrance control gates or turnstiles.

The CC100 helps reduce the cost of lost cards and greatly increases building security.

CC100 CARD CAPTURE

TECHNICAL SPECIFICATION:

Power Supply	24 Vdc
Power Consumption	24 Vdc 2 - 2.5 A
Environment	Internal use only

DIMENSIONS:

FEATURES:

1 COLLECT CARDS

Cards, their holders, pin clips up to 100mm wide, can be accepted. Lanyards can not be accepted.

2 INTEGRATION WITH ACCESS CONTROL READER

Any make of proximity card reader can be mounted to the device, all that is needed is a dry contact output signal from the access control to confirm the inserted card is valid.

After receipt of a valid card signal the valid card will be sent to the collection box. If no signal is received after a pre-set time the invalid card will be returned.

3 EASY MAINTENANCE

Bottom lockable access panel and easy access to the mechanism makes card collecting and maintenance easy.
